

Medcurity Announces Partnership with MediGroup

Thursday, August 5th, 2021

SPOKANE, Washington--Medcurity, a leading HIPAA compliance platform for healthcare organizations, announced today a partnership with MediGroup, a leader in focused group purchasing, to provide premier access to their industry leading security and privacy risk management tools for all 30,000 members.

“At MediGroup we continually search for solutions that help our members provide elite care within their communities,” says MediGroup’s CEO, Andy Klearman, “This partnership helps us in this endeavor by providing our members with an efficient software to work towards HIPAA compliance. Medcurity provides the most effective security and privacy compliance tool on the market, and we are thrilled to work with them to make a difference in the healthcare space.”

With the sharp rise in cyber security attacks, security risk awareness and proactive prevention is more important than ever before. Medcurity’s platform provides healthcare practices with an intuitive tool to complete their Security Risk Analysis requirement, as well as Privacy and Security Policies, Business Associate Agreements, and employee HIPAA training. Practices use Medcurity to meet their legal requirements, protect patient data, and protect their organization.

“We are excited to partner with MediGroup to continue making a difference for healthcare organizations and their patients,” says Joe Gellatly, CEO of Medcurity. “MediGroup has a fantastic reputation nationwide, and this partnership provides us with an opportunity to continue to improve the healthcare industry.”

About MediGroup

Based in Chesterfield, Missouri, MediGroup is one of the largest non-acute care group purchasing organizations (GPO) in the U.S. MediGroup works alongside its sizable roster of members - which includes surgical clinics, non-acute care facilities and physician offices nationwide - and helps them cut annual costs by connecting them with the best services and products. MediGroup specifically identifies those products or services that can maximize a member’s profitability and efficiency. This allows physicians to better engage patients with the proper care and consideration they deserve.

About Medcurity

Based in Spokane, Washington, Medcurity was founded by Joe Gellatly and Amanda Hepper. Their team has decades of experience in healthcare, technology, and compliance. Medcurity was built to help healthcare organizations manage complex HIPAA and security requirements in one powerful platform. Medcurity is a cloud-based platform that automates and manages all the requirements behind HIPAA compliance, from the HIPAA Security Risk Analysis to Privacy & Security Policies, as well as Business Associate Agreements.
