

# MEDCURITY

The HIPAA Compliance Platform

## Protect your organization and your patients' information.

Build or complement your HIPAA program with the most intuitive tools and helpful guidance available.

### Security Risk Assessments

Conduct your SRA in an intuitive tool with **explanations, definitions, and examples** throughout. Medcurity produces an **audit-ready final report** and provides you with **recommended, risk-stratified remediation actions**. You can assign these to team members and track from our executive dashboard.

### Custom Policies and Procedures

Build right-sized policies with our **guided templates** or upload your own as needed, and then **share them with your entire team**. Keep policies current and **receive prompts prior to review dates**, all from Medcurity's platform.

### Business Associate Agreement Management

Track Business Associates in a process that truly makes sense. **Customize and maintain** all your agreements in one place, **push them for e-signatures**, and **proactively manage your vendors** with more confidence.

### HIPAA Training Module

Train your employees on HIPAA requirements and **their role in keeping your organization compliant**. Track employee **course completion** in support of your annual HIPAA Security Awareness Training requirements.

## Additional Services:

### Onsite Assessment Services

Medcurity's team of experts **will come to you**. We will conduct a HIPAA Security Risk Assessment, including Security and Privacy safeguards. Your final report will provide **authoritative guidance on which areas to address first**.

### Network Vulnerability Scans

Medcurity will conduct a **full network assessment** identifying **internal and external vulnerabilities**. Your final report will **categorize and prioritize vulnerable areas** with suggestions regarding where to begin mitigation.
